#### Meeting about Meetings\OGF

Project	DFDL 1.0
Meeting Date	29-Nov-11 (Tues)
Meeting Time	15:00 - 16:00

Created by Steve Hanson on 09-Mar-11 Last Modified by Steve Hanson on 28-Nov-11

OGF DFDL Working Group Call , 29 November 2011

#### Agenda

Prepare for your meeting by describing the objectives (both immediate and long-term, if appropriate) of the meeting; and describe key details.

#### 1. Further spec issues

As implementation has progressed, a number of issues have been spotted in the DFDL 1.0 spec by the IBM implementation team and others. Remaining items for resolution:

8.3. Clarification on scoping combination rules when element reference and global element are involved. The DFDL occurs set of properties are 'not applicable' to a global element. If such a property appears directly on a global element, the IBM implementation treats this as a schema definition error. If such a property appears in a defineFormat annotation referenced by a global element, then the property is ignored as it is 'not applicable'. In the latter case, what if the global element is used by an element reference, does it pick up the occurs property?

#### 2. AOB

#### Minutes

#### **Meeting Minutes**

**Reflect** on your meeting as you record all topics and issues discussed, and any tabled conversations. What went well, or what would you do differently next time? Document those so others can take advantage of your learning.

#### Attendees

Steve Hanson (IBM) (co-chair)

#### Apologies

Minutes

1. Further spec issues

The following were discussed

2. AOB

IBM TeamRo

#### Meeting closed

#### Next call Tues 6th Dec 2011

#### Create Action Items

Record the to-do's and individuals assigned by entering the appropriate information in the form below. Press the "Create Action Items" button to create specific to do's that can be tracked in the assignee's Work for Me views. " All Action Items will be tracked in the Action Items and Other Meeting Documents tab.

#### Action Items and Other Meeting Documents

View: ResultDocs

Next action: 158

### Actions raised at this meeting

No Action

# **Current Actions:**

No	Action
123	<b>DFDL tutorial (Steve)</b> 13/10: Draft of first 3 chapters has been written and will be distributed to WG 10/11: Posted to grid forge here (http://forge.gridforum.org/sf/go/doc16106?nav=1), work continuing at IBM to define a standard example-based chapter framework and to author additional chapters. Contributors welcome! 17/11: Steve, Stephanie and Alan had a meeting to discuss the best structure for the tutorial

	and decide which examples to use throughout. The meeting raised more questions. Further
	discussions will be held. 24:11: The list of topics to be covered in the remaining lessons has been produced and a
	lesson template. Alan will write lesson 4
	01/12: Alan has started lesson 4 which covers fixed and variable fields and arrays.
	08/12: Alan has almost completed lesson 4. Will send out for review.
	15/12: First draft of lesson 4 is available for review. Alan to send to Bob and Joe. 22/12: Alan has distributed drafts for tutorials on Basic Structure and Optional/Repeating
	elements. Please review
	12/01: Alan distributed a tutorial for choices and updated the others. Alan and Steve
	reviewed them and updated versions will be sent soon. Should start on the 'representation'
	tutorials soon.
	19/01: The tutorials for basic structure, optional/arrays and choices have be updated. Please review. The tutorial for text elements should be available soon.
	26/01: No comments received about 3 tuorials distributed last week. Alan is still working on
	Text representation.
	02/02: Steve has sent comments on three tutorials. Alan to send updated versions by the
	end of the week. Alan has also distributed the first part of the tutorial on text representation
	and would like feedback.
	09/02: Steve had reviewed tutorials 3,4,5 and updated versions have been distributed. Joe reviewed lesson on text elements.
	Main points. Using 'represented as text' is confusing. Examples are too cluttered. Suggest
	simple targeted examples but still build up to final complete schema
	23/02: New versions distributed and Steve has commented.
	02/03: Alan has published the final versions of tutorials 4,5,6 and is working on text
	respresentations. There was some discussion about the detail that needs to be covered. Should limit it to 'common usage' and refer to the spec for details of edge cases.
	09/03: Alan distributed an update to the text tutorial. Please review.
	30/03: Steve has spent half a day tidying up lessons 1 to 6 and has uploaded them as pdfs
	to gridforge. They are now more coherent, and many inconsistencies and errors fixed.
	Ownership of draft lessons (text properties, binary properties, advanced features) has been
	passed to Steve. Also need to make a schema available for the examples.
	13/04: Steve is working on the text properties tutorial. 04/05: No progress
	18/05: No progress
	01/06: No progress
	08/06: No progress
	15/06: This is on hold until Steve clears up spec issues and other workload. Steph has
	looked at the later lessons, and noted that they are more direct compared to the more wordy earlier lessons.
	28/06: On hold.
	29/11: On hold
132	Publishing DFDL xsd (Suman)
	08/12: Agreed that it should be made available. Suman has started the approval process in IBM
	15/12: no progress
	22/12: no update
	12/01: Suman is getting approval from IBM to publish.
	19/01: Waiting to get IBM approval to publish
	26/01: no update
	02/02: No update 09/02: no update
	23/02: no update
	02/03: Suman is working through the IBM process to permit publication. There was
	discussion about what licence the XSD would be published under and how that would effect
	use in products. Suman to investigate
	use in products. Suman to investigate 09/03: No update
	use in products. Suman to investigate 09/03: No update 30/03: Suman has sent information to IBM legal. Reminded him about the license issue.
	use in products. Suman to investigate 09/03: No update

	has a couple more changes to make and will send to Steve for review. License clarification					
	needed. 18/05: Awaiting response from IBM legal. Suman will send Steve the model xsd for review. 01/06:					
	08/06. Awaiting response from IBM legal. Suman will send Steve the model xsd for review. 15/06: Steve has received the xsds (there are three of them) and will review. 28/06: Not reviewed yet					
	05/07: Need to fully understand what WG members are able to do with it. The real usefulness is in other implementers being able to use the xsds to validate DFDL xsds so the license needs to reflect this.					
	12/07: No further progress 19/07: Suman will talk to IBM legal and make it clear that the license must allow users to actively use the xsds.					
	26/07: No update 16/08: Steve has reviewed and sent comments to Suman. Suman has asked legal to clarify re-distribution rules, taking into account OGF licensing terms and patent filing. 23/08: No update					
	30/08: Steve has reviewed words from IBM legal. It looks like that once the xsds are published by OGF then they are free to be used under the normal OGF licensing terms. Steve needs to clear all this with IBM legal in Hursley, as the DFDL mission is owned by Hursley in UK.					
	20/09: Steve has mailed IBM Hursley legal					
	27/09: Steve to meet with IBM Hursley legal					
	<ul> <li>4/10: No further progress</li> <li>18/10: Steve has met with legal, can publish the xsds after tidy up. Will create OGF info document.</li> </ul>					
	1/11: No further progress					
	29/11: Waiting for Steve to find time to do this					
133	Make a set of default formats available (Suman) 19/01: Suman expects some default formats to be ready by Feb 9th. Will need approval to					
	publish 26/01: Stephanie sent the defaults used by test cases to Suman					
	02/02: no update					
	09/02: no update					
	23/02: no update 02/03: Same as 132					
	09/03: No update. Same license issue apply though.					
	13/04: No update.					
	04/05: IBM will make one default format available. Suman is working through the IBM process to permit publication. 18/05: Awaiting response from IBM legal.					
	01/06:					
	08/06: Awaiting response from IBM legal. IBM also want to prove that the default format has the properties sensibly defined to plans to include in internal testing. 15/06: No change.					
	 19/07: 19/07: Suman will talk to IBM legal and make it clear that the license must allow users to actively use the format xsd(s). 26/07: No update					
	16/08: Same issue as action 132 23/08: No update					
	30/08: As action 132 20/09: Steve has mailed IBM Hursley legal					
	27/09: Steve to meet with IBM Hursley legal					
	4/10: No further progress 18/10: Steve has met with legal, can publish the xsds after tidy up. Will create OGF info document.					
	1/11: No further progress.					
	29/11: Waiting for Steve to find time to do this

140	Spec issue: Parsing: 'missing' v 'empty', role of initiators , default values (All)			
140	01/06: See minutes. 08/06: Still under discussion. Tim has sent Mike a selection of data formats to guide the			
	discussion.			
	15/06: Not discussed - an extra call has been scheduled to go through this.			
	28/06: A series of extra calls are being held between Mike, Steve, Tim and Steph.			
	05/07: Next extra call is Wed 6th July - Steve to send invite			
	12/07: Two more calls held. Next call is Wed 13th July.			
	19/07: More calls held, next call is Fri 22nd July.			
	26/07: More calls held, good progress			
	16/08: Steve will set up next call for when Tim has returned from holiday			
	23/08: Two more calls scheduled for this week, remaining issues: separator suppression,			
	empty strings, sparse arrays (see action 136)			
	30/08: Call held earlier today. Still remaining - separator suppression (matrix); sparse			
	arrays; empty strings; empty value delimiter policy. Steve to summarise where we have got			
	arrays; empty strings; empty value delimiter policy. Steve to summarise where we have got so far before remaining items are tackled.			
	20/09: Steve has summarised where we are with action 140, which Tim and Mike have			
	reviewed. 2 hours call planned for Thursday.			
	27/09: Calls held, progressing the separator suppression behaviour			
	4/10: More calls held, progressing separator suppression, sparse arrays (see action 136)			
	and emptyValueDelimiterPolicy behaviour			
	18/10: All issues now in a single document, call held earlier today. Next call Thursday.			
	1/11: Extra calls still ongoing			
	8/11: Extra calls still going, when action 140 document complete will send to Steph for			
	review			
	15/11: Mike is verifying the action 140 conclusions by writing an algorithm in SCALA which			
	can be ultimately be used in Daffodil			
	22/11: Call to be held next week			
	29/11: Next call tomorrow			
145	Provide a 'dispatch' way of discriminating a choice for better performance of the			
	envelope/payload use case (Steve, Mike, Suman)			
	12/7: See minutes. Need to choose a proposal and flesh out.			
	12/7: See minutes. Need to choose a proposal and flesh out.			
	12/7: See minutes. Need to choose a proposal and fiesh out. 19/07: Waiting for proposals 26/07: Waiting for proposals			
	19/07: Waiting for proposals			
	19/07: Waiting for proposals 26/07: Waiting for proposals 16/08: Waiting for proposals. Suman added to action.			
	19/07: Waiting for proposals 26/07: Waiting for proposals			
	19/07: Waiting for proposals 26/07: Waiting for proposals 16/08: Waiting for proposals. Suman added to action.  1/11: Steve to send a proposal 			
110	19/07: Waiting for proposals 26/07: Waiting for proposals 16/08: Waiting for proposals. Suman added to action.  1/11: Steve to send a proposal  29/11: Waiting for Steve to find time to do this			
146	19/07: Waiting for proposals         26/07: Waiting for proposals         16/08: Waiting for proposals. Suman added to action.            1/11: Steve to send a proposal            29/11: Waiting for Steve to find time to do this         Model NRL's bit-oriented format where complex repeating element carries a 'last'

1	15/11: No update				
	22/11: No update				
	29/11:				
153					
	18/10: Need to keep as close to ICU as possible as an aid to implementers.				
	1/11: No progress				
	 22/11: Waiting for Steve to find time to do this				
154	Redistribute the IBM test cases (Steve)				
	8/11: Investigate the T&C from the original distribution.				
	15/11: Steve has received the IBM legal information				
	22/11: Steve now has approval to redistribute				
	29/11: Steve will send out the package today				
155	Errata: Timing of validation on unparsing (All)				
	8/11. Next step is to talk to XML Schema WG.				
	15/11: Steve was a call with Sandy Gao on Fri 25th. 22/11: Call on Nov 25th delayed until Dec 2nd				
	29/11: Call on Friday, Steve has sent mail to Sandy				
156	Errata: Investigate ICU fallback mappings when converting from Unicode (Mike)				
150	8/11: Need more information before errata can be taken				
	15/11: Action assigned to Mike				
	22/11: Mike making good progress - will send update by email. Unicode Character Mapping				
	Markup Language might be able to help here.				
	29/11: Discuss Mike's mail				
157	Errata: Should nilValueDelimiterPolicy apply to nilKind 'logicalValue' (Mike)				
	8/11. If an errata is to be taken, need to identify why this combination does not make sense				
	or is problematic in some way.				
	15/11: Action assigned to Mike.				
	One issue is with the value space of the nilValue overlapping with the value space of the initiator. Need to provide greedy rules that allow this to be resolved.				
	Mike concerned that logicalValue being sensitive to nilValueDelimiterPolicy does make				
	implementations more complicated.				
	Can be argued that with logicalValue the nil value must be in-band, so why allow such a				
	value to appear with a different delimiter policy?				
	Mike to write up why this should be changed.				
	22/11: Mike has distributed a proposal to the WG, discuss next week				
	29/11: Discuss Mike's mail				

# **Closed** actions

No	Action

# Deferred actions

No	Action
129	Press release to publicise DFDL (Steve) Steve is pulling together a press release at IBM. Want to include as many contributors and interested parties as possible.NCSA are keen to be included. Also likely that US National Archive will want to be included. Mike has indicated OCO are too. 17/11: no progress
	 08/12: Still no response from IBM press office 15/12: no progress
	 09/03: No progress 30/03: Making this action deferred until IBM is in a position to say something more concrete about any implementation.

131	Transformation of DFDL properties to a canonical form (Joe) 08/12: Joe has produced a XSLT to transform a DFDL schema to a canonical element form. When tested it should be made available on the WG gidforge site. 15/12: Alan tested against test dfdl schema which worked correctly (after fixing some errors in the schema) 22/12: no update 12/01: Joe has some defects to fix before making available on gridforge. 19/01: There is a difficult problem to solve before Joe make the style sheet public 26/01: Working on problems 02/02: no progress 09/02: As it wasn't a simple as exoected this will be treated as a low priority action 23/02: Low priority 09/03: Low priority 30/03: Deferring for now
066	Investigate format for defining test cases (All)
000	25/11:IBM to see if it is possible to publish its test case format.
	04/12: no update
	17/02: IBM is willing in principle to publish the test case format and some of the test cases.
	May need some time to build a 'compliance suite'
	24/03: No progress
	03/03: Discussions have been taking place on the subset of tests that will be provided.
	10/03: work is progressing
	17/03: work is progressing
	31/03: work is progressing
	14/04: And XML test case format has been defined and is being tested.
	21/04. Schema for TDML defined. Need to define how this and the test cases will be made
	public
	05/05: Work still progressing
	12/05: Work still progressing
	02/06: Work still progressing on technical and legal considerations
	25/08: Will chase to allow Daffodil access to test cases. The WG should define how
	implementation confirm that they 'conform to DFDL v1' 01/09: IBM still progressing the legal aspect. Intends to publish 100 or so tests as soon as it
	can, ahead of a full compliance suite.
	08/09: IBM still progressing
	15/09: IBM still progressing, expect tests to be available within a few weeks
	22/09: IBM still progressing, expect tests to be available within a few weeks
	29/09:Test cases are being prepared.
	06/10: Some test cases should be available next week. Steve would like to be able to show
	the test case information at OGF 30.
	13/10: Still progressing
	10/11: Legal issues cleared, IBM in process of collecting 100 example test cases, ideally
	ones that fit the 'extended conformance' of NCSA Daffodil
	17/11: Work is progressing on verifying the test cases. It should be possible to distribute to
	the WG in 2 weeks.
	24/11: About half the test cases have been completed and are being reviewed internally.
	01/12: Test cases should be available shortly 08/12: The test cases are in internal IBM review. Probably need a bit of reorganising before
	publication
	Stephanie gave a brief overview of the format of the test cases.
	15/12: Ruth joined the call to provide the latest status. The test cases have been updated
	and a draft read.me produced. Although not ready for public distribution Ruth will send them
	to Joe for feedback.
	22/12: Test cases were sent to Joe for initial testing which found some problems in the
	Daffodil parser
	12/01: All current tests use a default format whih Daffodil doesn't currently support. Joe
	suggested that there should be test that defined the same function using different definition
	forms. Also suggested that default formats should be provided by the WG. This had always
	been the intention. Action 133 raised to track.
-	· · · · · · · · · · · · · · · · · · ·

19/01: There is currently no resource available in IBM to make more tests available. IBM to discuss how/if it can make a 'minimal compliance test suite' available. 26/01: Action kicked off within IBM. There was a brief discussion abot naming and organisation of test cases but no preferences were expressed 02/02: IBM will not have the resources to develop a full test suite in the near future. Steve suggested that we produce a list of required test cases so that anyone could supply them. 09/02: Steve had previously sent a list of areas to be tested. Please review. 23/02: Please review Steve's list of areas to be tested 02/03: Alan had reviewed Steve's list and we went through his comments. Agreed there is no need for separate tests for the infoset or for dfdl: property lists, unions etc but comment will be added that these should be exercised during property testing. 09/03: Alan updated the test document. Need more introduction and perhaps adopting the OGF template. 30/03. Ownership of test document passed to Steve. This action is merged with 112 and will cover all aspects of compliance suite. 13/04: IBM will not have time to create a compliance suite in the near future. Probably best to make this action deferred for now.

# Work items:

No	Item	Owner	Target	Status
043	Track errata list for 1.0 of the spec. http://forge.gridforum.org/sf/go/doc16280?nav=1	Steve		Draft 0006 on grid forge.
	1 mip.//lorge.ghulorum.org/si/go/uoc10260?nav=1			gnu lorge.
044	Incorporate errata list into DFDL spec.	Steve	TBD
