

# SLAs for Grids and Clouds

**3<sup>rd</sup> SLA4D-Grid Workshop**

**9<sup>th</sup> November 2011**

**Leibniz-Rechenzentrum, Garching, Germany**

The 3<sup>rd</sup> SLA4D-Grid Workshop will take place on 9<sup>th</sup> November 2011 at the Leibniz-Rechenzentrum ([www.lrz.de](http://www.lrz.de)) in Garching near Munich.

The BMBF funded project SLA4D-Grid ([www.d-grid.de](http://www.d-grid.de)) is designing and realising a Service Level Agreement (SLA) layer for Germany's national Grid infrastructure D-Grid.

In the 3<sup>rd</sup> workshop we will analyse existing solutions for SLAs, present handling of SLAs in Grid and Cloud infrastructures, and identify major obstacles in automation of SLA creation, negotiation and monitoring.

We are looking for contributions on the following topics:

- Ready to use SLA solutions
- SLA handling in Grid or Cloud infrastructures
- Legal (and other) issues in automation of SLA

If you are interested in contributing to or participating in the workshop, please contact Daniel Mallmann ([d.mallmann@fz-juelich.de](mailto:d.mallmann@fz-juelich.de)).
