Current Draft Situation (Andreas owns the doc)

- Andreas to put in FileSystem stuff
- Andreas to put in Process Topology stuff
- Donal, Steve, and Igor to sort out the document-oriented schema. Andreas to put it in the document. (may need to be discussed at GGF)
- Donal to finish wording on Limits

- Profile section needs looking at. (Darren) Make sure it is explained completely. (Psuedo Code)
- Translation Table Appendix (Darren)
- Steve to look at the introduction, specifically how JSDL fits with everything. Diagrams need keys and more documentation. Acronyms need definition.
- Examples need to be filled in some more.
  - \* (Andreas for Multi-process)
  - \* (Donal for Web Services)
  - \* (Darren Basic Job Submission)
  - \* (Steve SQL Job Submission)
  
- We need to have a complete example that is meaningful throughout the examples in each section (Nice to have)
