DMTF Feedback Policy

Thank you in advance for your willingness to report an issue or bug in a DMTF specification!

Most issues and bug reports will raise no intellectual property issues at all, but since some may, we need to be sure that our specifications are in compliance with our Patent Policy. Accordingly, we ask that you agree to certain terms that the original submitters of the specification also agreed to.

Intellectual Property Rights Agreement

By clicking "Accept" below, you agree that you have read and will abide by the following:

An Individual Proponent submitting a new contribution to the DMTF for consideration as part of a technical standard shall disclose to the DMTF Technical Committee any personal knowledge or awareness of any patent which could be infringed by an implementation of the Submission.

You are not making any other warranty, and your issue or bug report and any suggested correction that DMTF may incorporate into a specification will be accepted by DMTF "as is".

Neither the Individual Proponent nor the Proponent's organization shall be required to conduct a patent search with respect to the Submission. A Proponent is encouraged but not required to include a statement from his or her organization indicating (1) the organization's licensing policy with respect to patents it owns or controls and/or (2) whether a search was performed on the Submission and, if so, its general scope.

If you do not wish to (or cannot) comply with these terms, please click on "Do Not Accept", and we will refer your inquiry to technical or legal experts who may be able to help you.

Accept   **Do Not Accept**
