Motivation

- several implementations of SAGA
 - different languages (not necessarily)
 - different characteristics
 - features (e.g. automatic/configurable context selection, timeout...)
 - optimizations (e.g. caching of connections, meta-data, states...)
 - design choices (e.g. high-level / low-level adaptor interfaces)
 - different supported API extensions (e.g. SD, Advert, Messaging)
 - different supported technologies (adaptors)
- how to use all these API & technologies simultaneously ?

C++ Bindings SAGA

Java Bindings for SAGA

Java SAGA

Motivation

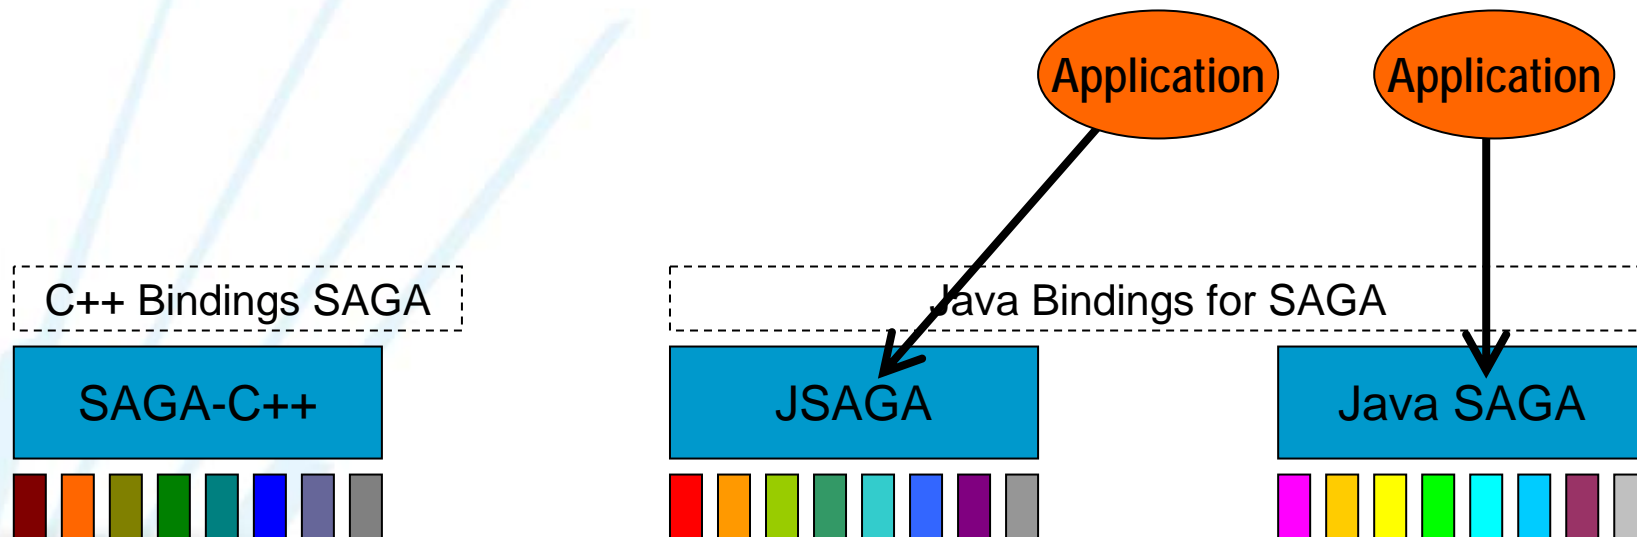

- several implementations of SAGA
 - different languages (not necessarily)
 - different characteristics
 - features (e.g. automatic/configurable context selection, timeout...)
 - optimizations (e.g. caching of connections, meta-data, states...)
 - design choices (e.g. high-level / low-level adaptor interfaces)
 - different supported API extensions (e.g. SD, Advert, Messaging)
 - different supported technologies (adaptors)
- how to use all these API & technologies simultaneously ?

Java SAGA and JSAGA

Java SAGA and JSAGA

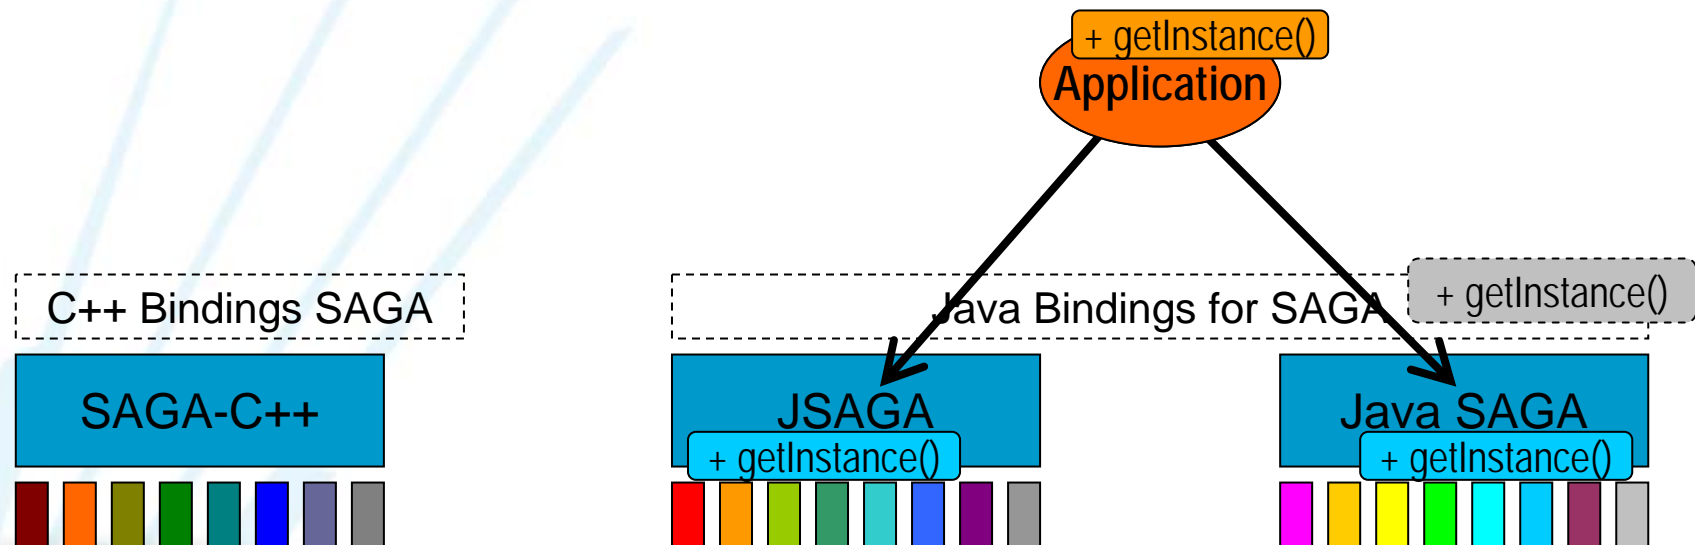

```
System.setProperty("saga.factory", IMPL_NAME);
```

```
File f = FileFactory.createFile(url); // old code
```

```
File f = FileFactory.getInstance().createFile(url); // new code
```

```
File f = FileFactory.getInstance(IMPL_NAME).createFile(url); // new (thread-safe)
```

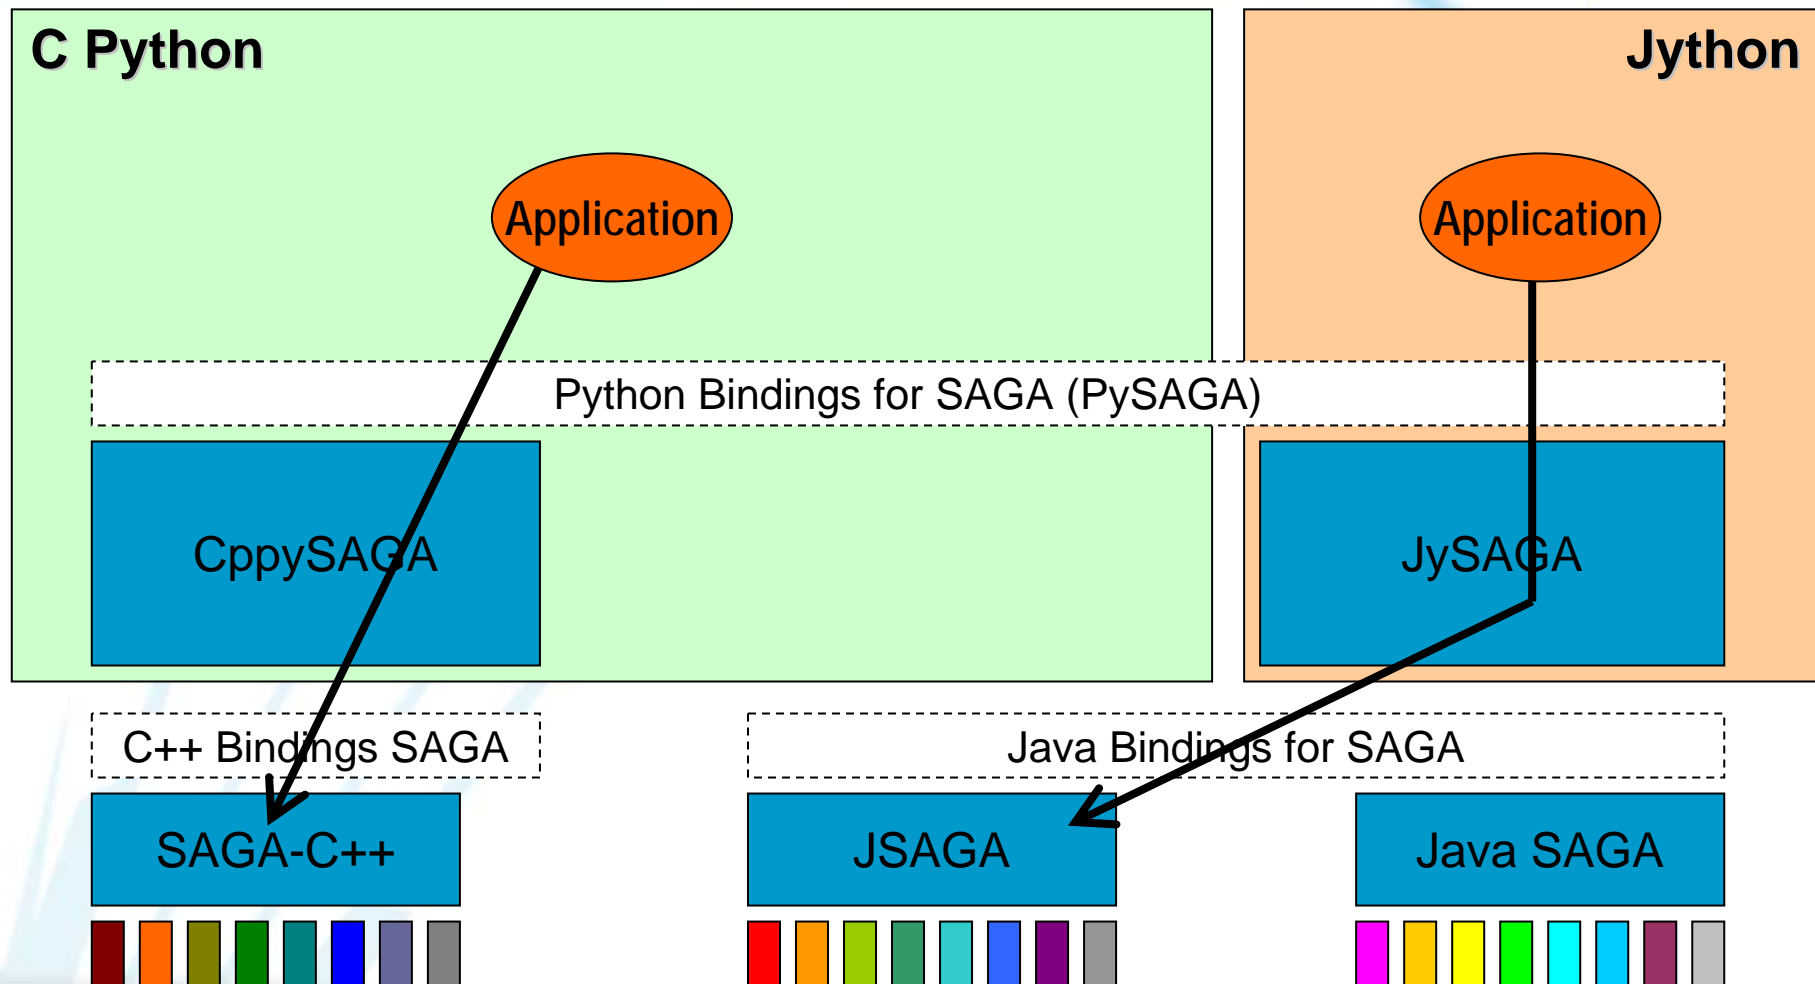

Demonstration #1

- get more supported technologies
 - example with "ls -l"
 - list some URL with JSAGA
 - list some URL with Java SAGA

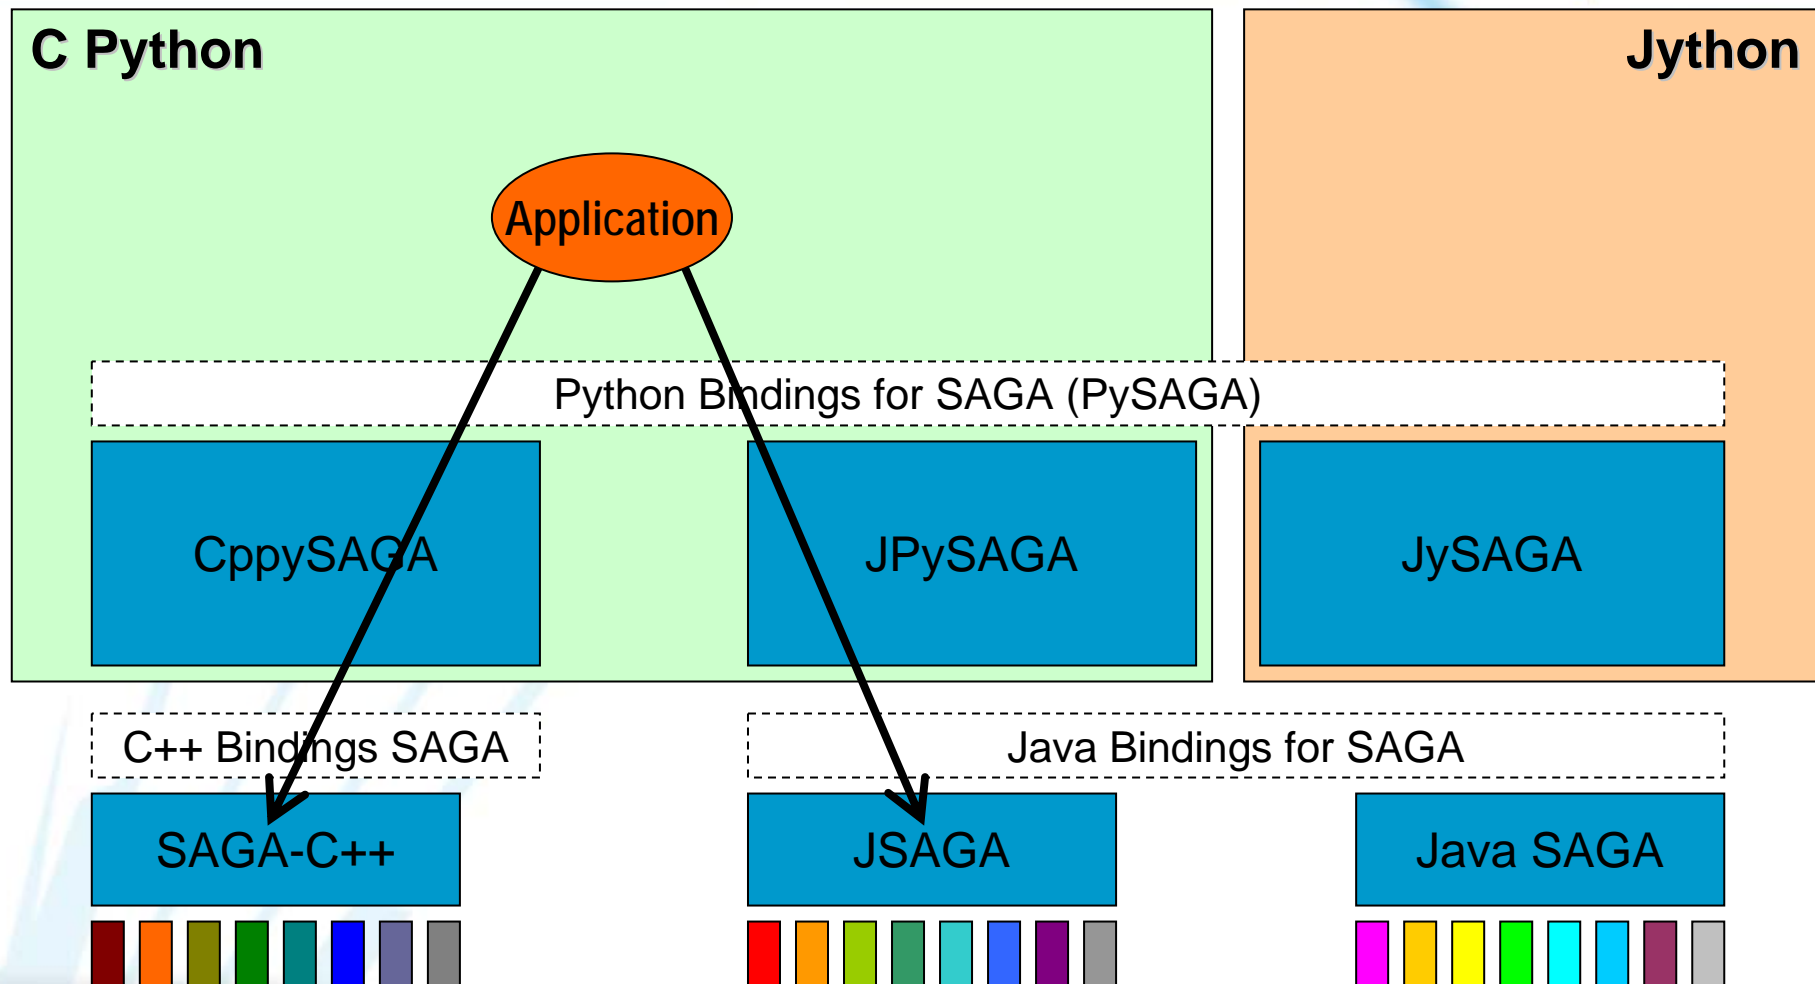

SAGA-C++ and JSAGA

SAGA-C++ and JSAGA

Demonstration #2

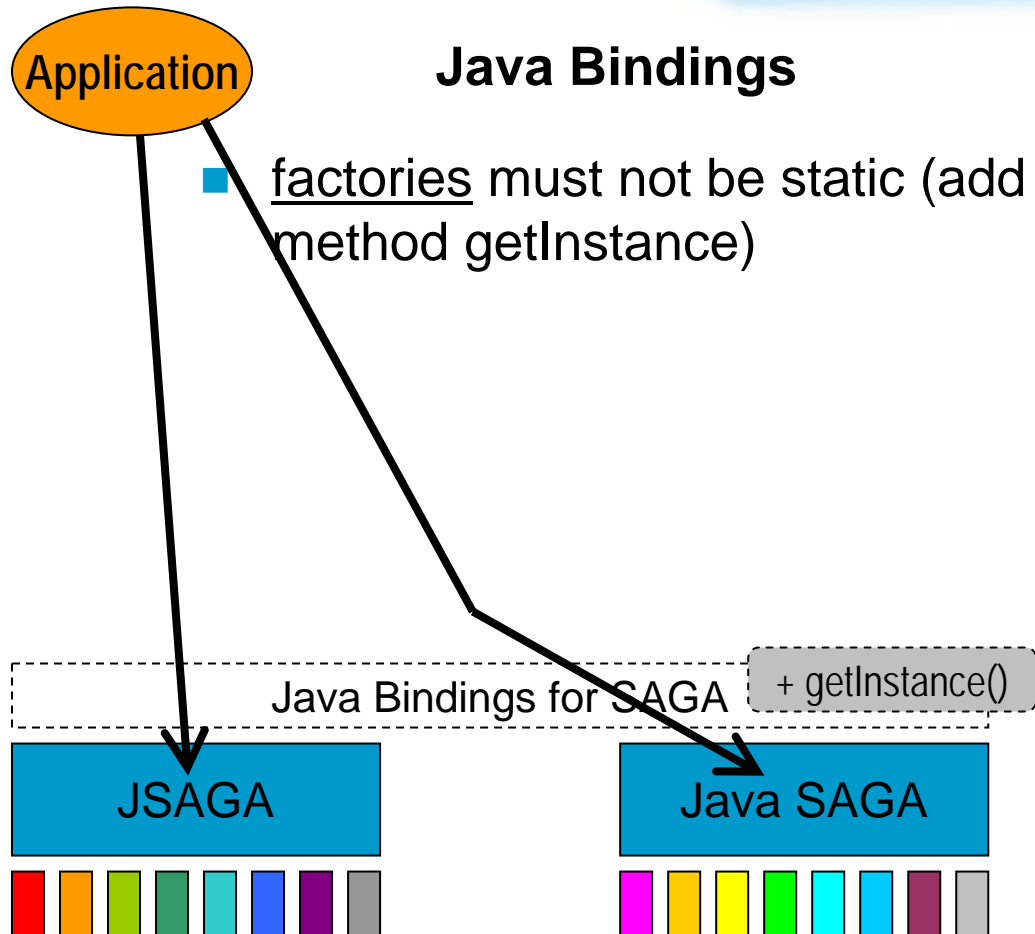

- get more supported technologies
 - example with "ls -l"
 - list some URL with JPySAGA/JSAGA
 - list some URL with CppySAGA/SAGA-C++
 - example with "job-run"
 - run the job on some resources with JPySAGA/JSAGA
 - run the job on some resources with CppySAGA/SAGA-C++
- get more functionalities
 - example with "find" and "cat"
 - find an URL with JPySAGA/JSAGA
 - then dump its content with CppySAGA/SAGA-C++

Conclusion

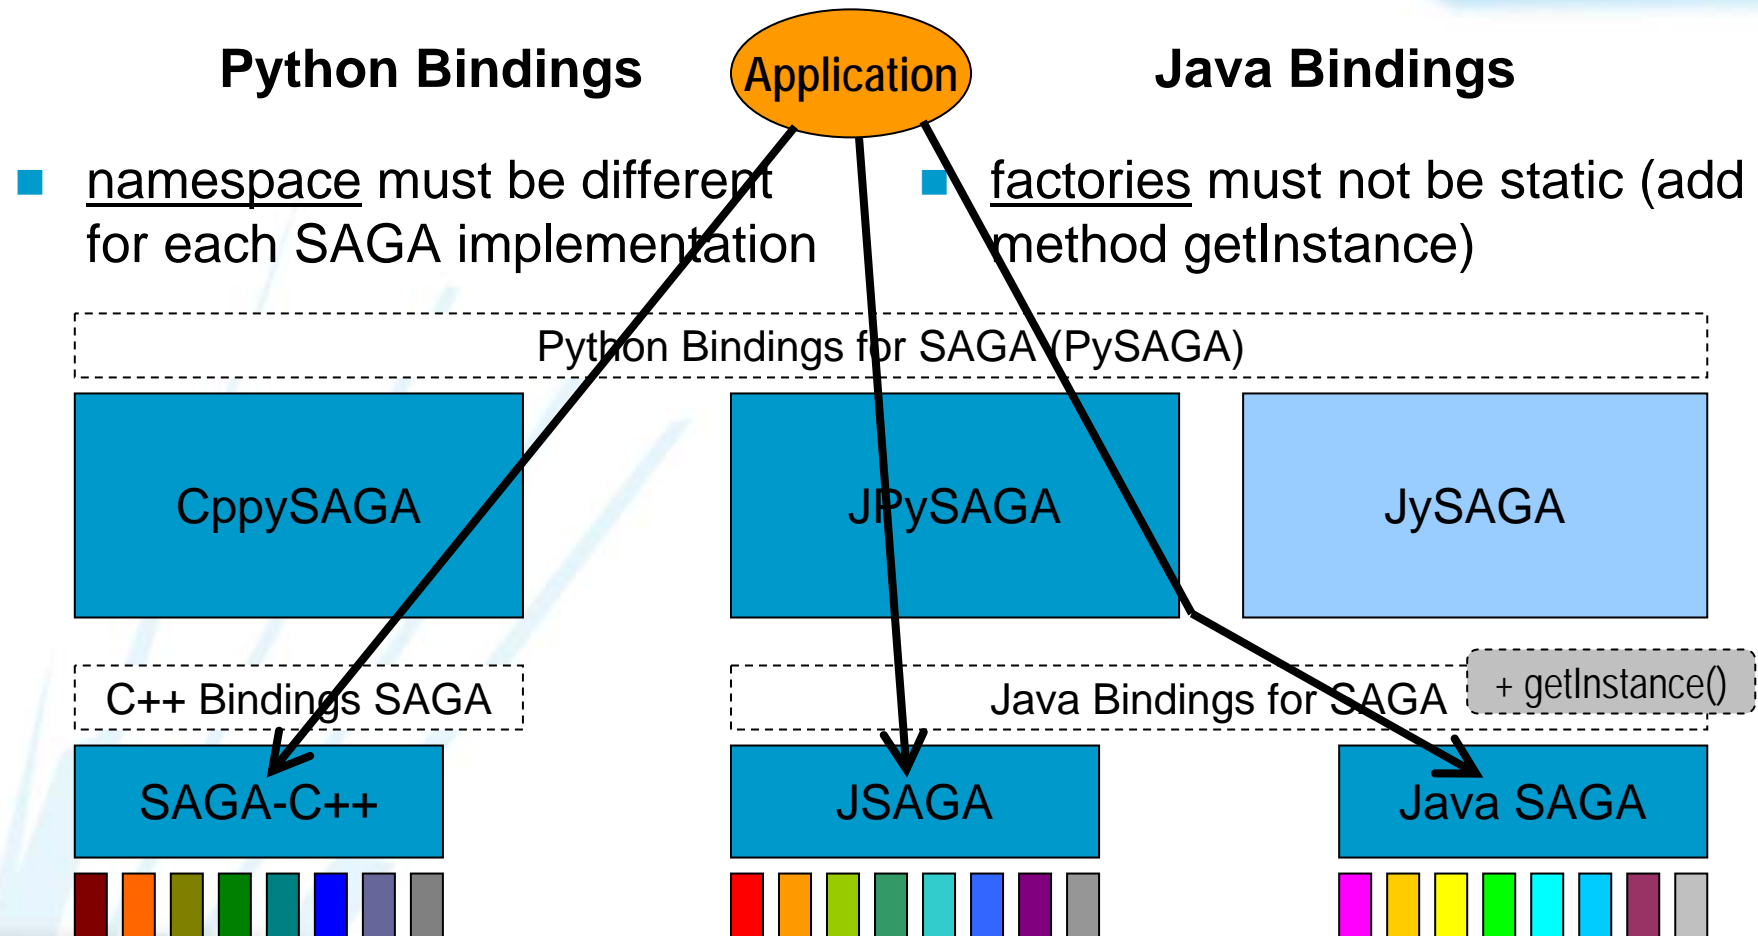

Coexistence of SAGA impl. is possible with few modifications...

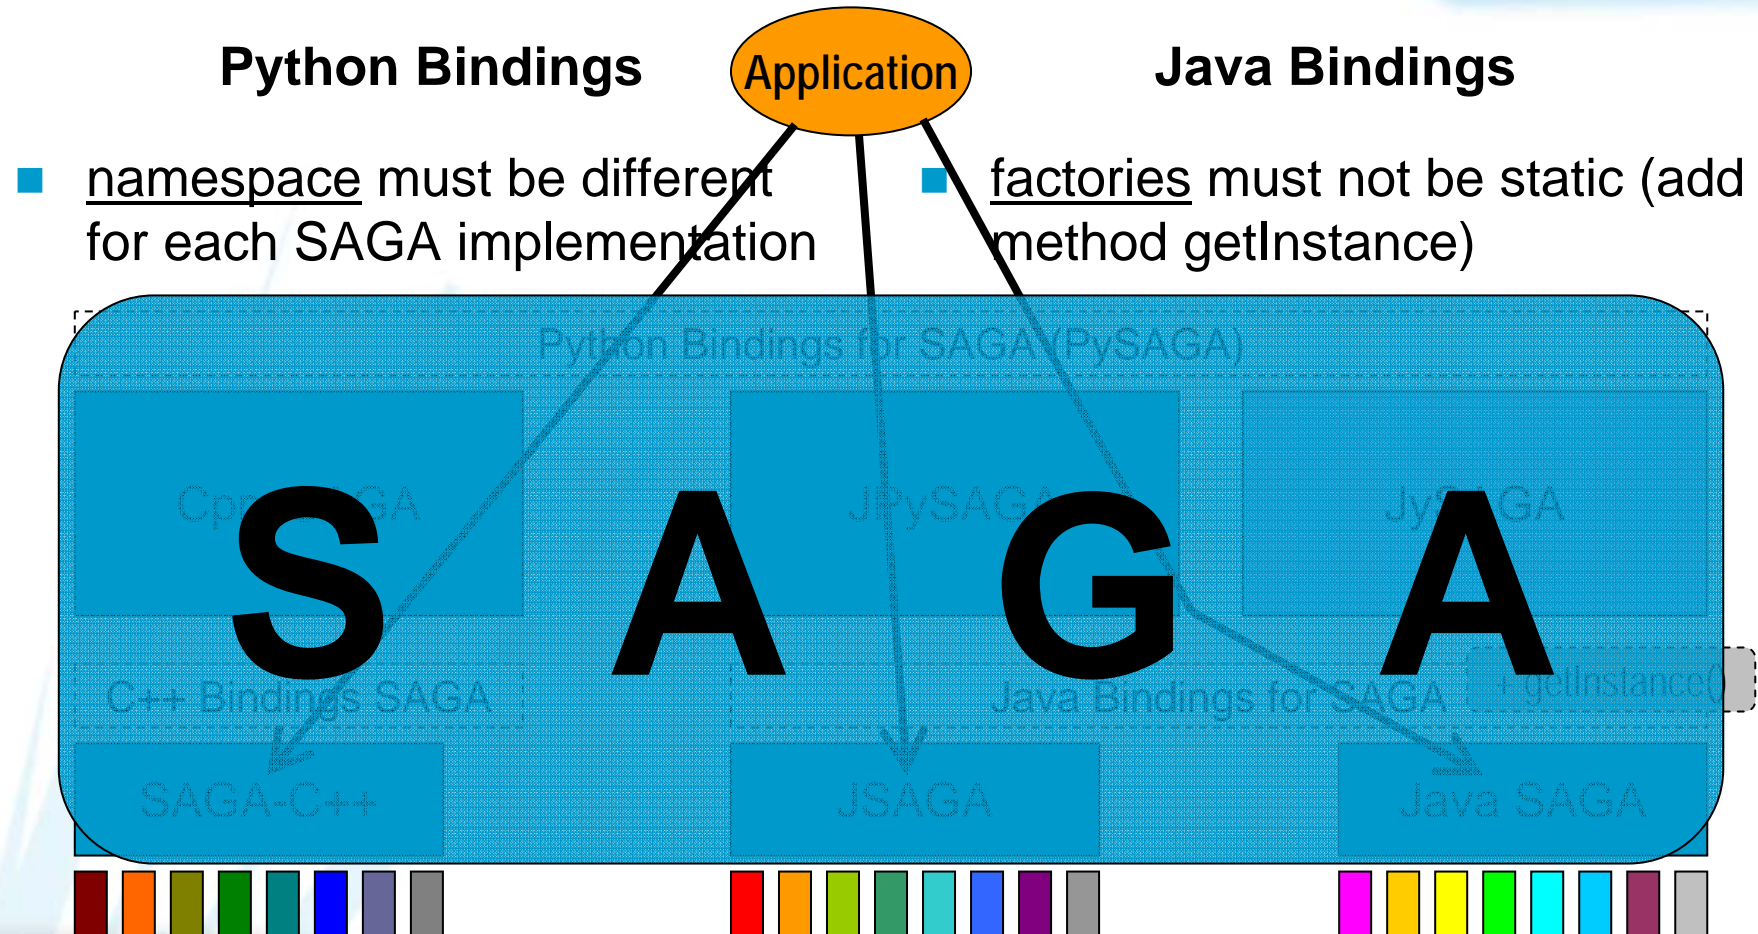

Conclusion

Coexistence of SAGA impl. is possible with few modifications...

Conclusion

Coexistence of SAGA impl. is possible with few modifications...

Questions ?

Overview of SAGA impl./wrappers
