****2021 IF: 6.558 (Quartile: Q1, JIF Percentile: 83.84%)****

Introduction

In Human-centric Computing and Information Sciences (HCIS), KIPS-CSWRG plans to publish high quality papers which cover the various theories and practical applications related to human-centric computing and information sciences. In HCIS 2022 workshop, the published papers are expected to present results of significant value to solve the various problems with application services and other problems which are within the scope of HCIS. In addition, we expect they will trigger further related research and technological improvements relevant to our future lives. These are the hot topics that will satisfy the ever-changing needs of a world-wide audience. In approximately 5 to 10 years the editors plan to include new emerging topics to HCIS 2022 scope, in order to make the workshop reflect future generations' IT related human-centric computing and information sciences.

Important date

- Submission Due: **Jul. 31, 2022 (Final extended)**
- Author First Notification: **Aug. 01, 2022**
- Registration Due: **Aug. 3, 2021**
- Conference Date: **Aug. 16-18, 2022, Jeju, Korea**

Submission Guidelines

- Authors should submit a full paper with a single column in length, including all figures, tables, and reference (within 15 pages)
- All accepted papers will be included in the BIC 2022 conference USB proceeding (without ISSN/ISBN) - only one page.
- After finishing HCIS 2022, the representative papers in HCIS 2022 workshop will be published to the special issues of the international journals indexed by SCIE journals including HCIS journal. - webpage: <http://bic-conference.org/2022/hcis2022/>
